How can I stop Parrot AR.Drone 2.0?

2019/12/03

Hello Liam! You have probably watched the video published here though I might mistake. Still Parrot AR.Drone 2.0 is the improved model of the original Parrot AR.Drone and it has many features which might be both handy and dangerous, depending on the person in control of that drone. The video demonstrates how effortlessly anyone can control this UAV so your desire to have some protection from it is quite easy to understand. Parrot AR.Drone 2.0 has a nice front camera with great 1280x720 resolution that allows this surveillance UAV to record high quality video to the on-board USB stick or SD card or it can simply send the video directly to the device which controls it. As for those devices in control of the drone, they are Android or iOS devices and might be iPad, iPhone or iPod Touch. Irrespective of the device used to control Parrot AR.Drone 2.0 it uses WiFi frequency band to connect to it. It is also worth mentioning that this surveillance drone can be seen in two modifications: the first one that is seen on the video is for outdoor usage, and the second one has foam bumpers for its rotors to be protected from collisions with walls and other objects and it can fly indoors. In addition it has an Absolute Control mode that allows Parrot AR.Drone 2.0 to turn right or left regarding to the position of the person controlling the UAV and no matter what direction this drone is turned to. Despite the fact that this surveillance robot is highly maneuverable and easily controllable drone, you can stop Parrot AR.Drone 2.0 from spying on you, flying around your house or even inside your home. In such way you can grant safety and calm life to you and your family!

## **anti jammer mobile number**
