How can I protect myself from Lehman Aviation LFPV UAV?

2019/08/19

Hello Guy! Lehman Aviation created its newest UAV with a whole package of advantages and interesting features. It is called LFPV. Among its features there are 11 megapixel camera that can capture 1080p video and make nice photos on the fly, autopilot and many more. It is very important to notice also that it has GPS coordinates monitor, altitude monitor and even battery charge monitor which will alert LFPV owner or the person who uses remote control to operate it when something is wrong. Lehman Aviation LFPV UAV has the Ground Control System with 800x480 real-time video of its flight transmitted through the camera installed in this UAV and, as it was mentioned before, an autopilot for the situations when it is necessary. The cost of this beautiful civilian surveillance drone is \$2352, but it really seems that it is worth the money to be spent for the person who wants to conduct reconnaissance of other person's private life. To have real protection against this UAV, you need to do the same that works for most UAVs - namely block remote control of the Lehman Aviation LFPV UAV thus making it uncontrollable and crashing in the nearest wall or tree. After such incident the evildoer who was watching you will think twice if it is worth spending such sum of cash for this drone again risking to lose it in the same way!

gps jammer mobile account

Tell us about them in the comments, stay connected at home, users can block sms from a particular number also.
