Can Verizon Jetpack 890L 4G hotspot be dangerous?

2019/07/17

Hello Maria! Verizon Jetpack 890L 4G hotspot is an LTE enabled electronic device that you can use to instantly create 4G hotspot with high-speed access to the internet for up to ten WiFi enabled devices, be it laptops, smartphones, tablets or something else. It is made by huge Chinese communication equipment manufacturer ZTE and it has Global Ready roaming inside. At first glance Jetpack 890L is an awesome device that is hard to imagine being used in the wrong way. Sadly it can. As long as Verizon Jetpack 890L 4G hotspot creates internet access for ten WiFi enabled devices and any device with WiFi connectivity in its vicinity will connect to this network, there is a real danger. In the same way as WiFi Hotspot Cufflinks can crack the WiFi access this 4G hotspot activator can do the same thing but for whole ten devices. So if you have important information on your laptop, PC or other device with wireless internet access and you want to protect it, you need to block Verizon Jetpack 890L 4G hotspot and secure your house or office or other place from hacking threat.
