Is it possible to jam wireless LAN network?

2019/07/09

Hi Emily! In case you don't know here is some information for you: wireless LAN, also known as WLAN, is working using 2.4G frequency band (2400MHz frequency). Concerning this information there is only one conclusion to be made - you need to use wireless signal jammers that are capable of blocking 2.4G band and thus wireless LAN networks as well. Those wireless signal jammers have different size and jamming power, and as a result of it they have various blocking range as well. So in order to select the right model for yourself you need to precisely determine the distance to the WLAN you want to jam and the radius that must be covered by the blocking signal of your 2.4G jammer. I hope this information is useful to you and new knowledges would help you to solve your problem with the wireless LAN network around you! :)
