What can save me from Telesoft Technologies HINTON Abis Probe?

2019/07/09

Hi Xavier! Telesoft Technologies cooperates with many different companies in the area of communications. They provide those companies with the services they call "probing". Their probes are passively monitor many information, working as both locators and monitors in such networks as GSM, UMTS, CDMA and 3G. Those probes can trace location of your phone, texts and even conversations. As long as Telesoft Technologies use passive probing technology, the user of infected mobile phone does not even know about he or she is being probed and monitored. And because of that you need to use HINTON Abis Probe jammer that would protect you from all kinds of cell signal surveillance that may be used to spy on you and listen to your conversations. Even 3G band would be blocked and thus completely secured from any surveillance breach!
