Are there any variations of jammer power supply?

2019/07/09

Hi Danny! When you select the exact model of signal jammer you would like to purchase, it is very important to consider all details. There are really many things to point out, and by browsing this jammer wiki you can get many useful information regarding signal jammer selection. And one of those important things to know is the jammer power supply variations. The most types of portable jammers have both rechargeable battery inside and a set of two power adapters - AC and car chargers. Great example of such jammer is this GPS/GSM jammer. But this concerns compact jammers, and desktop jammers have only power adapter and no internal battery, like this jammer. And there are also unique jammers like car GPS jammer that has no battery or adapters but uses car lighter as its source of power. Thus think about it very well and decide what type of power supply you prefer before the actual purchase.
