What is a wifi jammer?

2019/07/17

Hello Rajesh! WiFi jammer is one of the many types of signal jammers created to help people solve different problems coming from cell phones, radio signals and wireless connections. Every kind of signal jammer is designed to work with specific frequency range, and WiFi jammer is not an exception. WiFi signal jammer has been made to successfully block wireless signals in WiFi frequency range (2.4-2.5 GHz) and in addition it blocks Bluetooth signals because they match the same frequency range. Everything else in this type of jammer works the same as in other jammers, maybe with some minor differences. For you to understand what is a WiFi jammer even better just look at our powerful WiFi signal jammer which also can deal with GSM and 3G signals as well. We hope that now you can understand what is a WiFi jammer and differ it from other types of signal jammers. If you want to get more information about it, read the WiFi jammers description at our online store.
